

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-45. (canceled).

46. (new) A wall mirror comprises a reflective surface, a non-reflective portion provided within the reflective surface as an information provider, wherein at least a portion of the mirror is transparent for seeing therethrough and is backed by a display provided with a moving image, whereby the display is provided with an interchangeable item of information, and a flat frame structure including a frame, wherein the display is mounted in the frame for attachment to a wall.

47. (new) A wall mirror as set forth in claim 46, wherein the display employs one of TFT and plasmas technologies.

48. (new) A wall mirror according to claim 46, including at least one loudspeaker connected to the display.

49. (new) A wall mirror according to claim 48, wherein the at least one loudspeaker is connected to an input device.

50. (new) A wall mirror according to claim 46, wherein the display is connected to an external input device.

51. (new) A wall mirror according to claim 46, wherein the mirror is part of a mirror insert which is within the frame, forming a mirror interior.

52. (new) A wall mirror according to claim 51, wherein the mirror is part of a mirror attachment which is fitted onto the frame to form the mirror interior.

53. (new) A wall mirror according to claim 46, wherein the display is secured to the frame by strut means.

54. (new) A wall mirror according to claim 48, wherein the loudspeaker is associated with a perforated region of the frame.

55. (new) A wall mirror according to claim 46, further including a radio receiver module for the image data.

56. (new) A wall mirror according to claim 46, further including an integrated infra-red remote operating means for volume control.
